

Special newsletter

Dear friends and sympathizers of the Pegasus Museum,

This special newsletter, intends to inform you all quickly of a recent important decision regarding our new Pegasus Museum.

As announced in the last newsletter of December, the City of Diest has submitted a subsidy application to the Flemish Region. These subsidies would be used both for the furnishing of the spaces of both the Tourist Office and our Pegasus Museum. The City of Diest was informed by the Flemish Region of a negative advice on this subsidy application. So there will be no extra resources for the design coming from Flanders.

This will certainly have an impact on the financial resources that we can use for the modernization of our future Museum. However, let's not forget that these Flemish subsidies always had to be considered a nice extra! The plans of the Wondering company can still serve as inspiration to us. With our own resources and perhaps some extra support from the City of Diest, we will build our new Museum step by step.
